No equipment to purchase
if you own ANY of these!!

For those practitioners whose scope of practice includes acupuncture, the procedure may be used with needles as a specialized technique.

In today's economy and with health insurance payments at an all time low, our patients are seeking quick clinical response in as short a time and most affordable care as possible. This procedure as a compliment to chiropractic, meets that objective. May be billed separately as physiotherapy, chiropractic or State Law allowing, acupuncture.

Ask for "Spinal Huo Tuo Therapy" class.

"Life is the expression of tone. From tone originates all the principles which constitute the science and philosophy of Chiropractic. It is a self evident fact that any change in tissue other than that of normal tension, produces disease. Consequently, the cause of disease is any variation of tone too much or too little". D.D. Palmer

Course Objective:

This program places its primary technique and clinical emphasis on manual and instrumental therapeutic treatment of symptomatic or pathological sympathetic and parasympathetic neurological imbalances by stimulation and deactivation of sensory and motor nerve distribution points. This is accomplished through spinal dermal reflex stimulation and adjusting procedures utilizing physio-therapeutic modalities. This includes transcutaneous electric nerve stimulation, neurological percussion hammer, low impact vibratory stimulation, motorized and manual adjusting instruments, Wartenberg pinwheel, laser and photo dynamic therapy, neurological tuning fork, Graston/Gua Sha therapy and cutaneo viscera reflex therapy through external stimulation both modern and historic to the chiropractic profession.

The procedures discussed are all a vital part of chiropractic practice acts nationally and are taught in Council on Chiropractic Education approved Chiropractic Colleges. This program focuses totally on State Board accepted physiotherapy and adjusting procedures however, States whose practice acts include acupuncture, the procedure may be practiced through superficial needle stimulation as a specialized technique.

To be able to apply the principles, theories, techniques and procedures of "Spinal Huo Tuo Therapy" as a part of the practice of chiropractic with ease, confidence and competence is the objective of this class.
