This program in "Medical Clinical Acupuncture" for professionals is designed for physicians and doctoral students of all healing disciplines.
It specifically deals with the theory, philosophy, diagnostic methods and specific acupuncture techniques and practices of both ancient and contemporary origin.
Acupuncture physiology, meridian pathways, special points, practical and theoretical Laws of Five Elements and effectively applying the concepts of acupuncture into an existing practice is essential.
Ear (Auriculotherapy), Cerebral, Hand and Korean Hand systems are included. This is without question the most practical, dynamic, clinical applicable program of this type.

Earn FELLOWSHIP in "Medical Acupuncture"
